

## **PRESS RELEASE**

### **Simms International expands product portfolio with Intel**

#### **UK distributor adds Intel Enterprise SSDs to its world-class offering...**

7 November, Kent/UK: Simms International plc is now distributing the [Intel Enterprise SSD range](#) as an **Intel Memory and Storage Specialist**.

Intel's rugged SSDs have no moving parts and are excellent for use in devices and for applications that require speed and reliability. Intel's pioneering Optane™ memory is revolutionary – the first all-new class of memory in 25 years - creating a bridge between DRAM and storage to deliver intelligent, highly-responsive computing for the HPC market.

With a range of capacities up to 8TB, multiple form factors (2.5", M.2, AIC and U.2) and interfacing with SATA III and latest-generation PCIe NVMe, Simms sees substantial opportunity for the company to support MSPs, VARs and system integrators in reducing costs and improving efficiencies for their customers:
