

Continued Professional Development and Business Process Assessment in Obsolescence Management

May 2016

Introduce Continuous Professional Development (CPD)

- IOM Certificate
 - Accredited by the IOM
- IOM Diploma
 - Accredited by the IOM

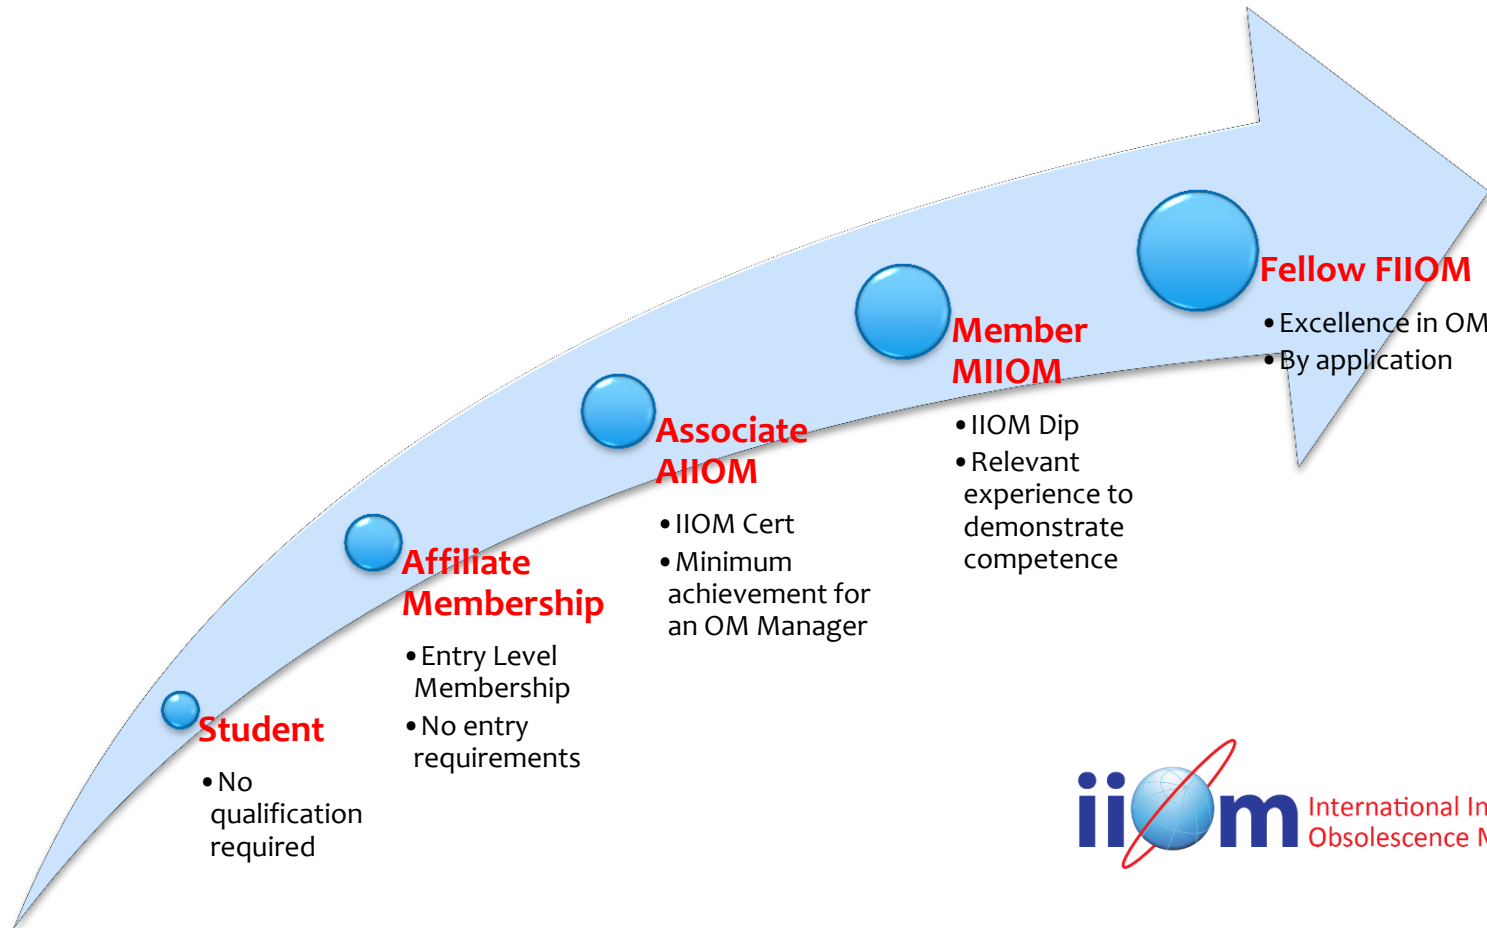

Individual Memberships will allow individuals to progress up the CPD ladder

The higher the IOM qualification the higher the membership recognition

Experience will be taken into account to determine the entry point

- Develop Competence Recognition for Obsolescence Practitioners
- Individuals will be able to demonstrate competence and experience to current and prospective employers.
- Post Nominal Letters will be awarded
 - AIIOM
 - MIIOM
 - FIIOM

Membership by Examination

The Certificate will be available in April 2017

The Diploma will be available in April 2018

There are more than forty registered individuals who plan to undertake this training when it is available and this is before concentrated marketing has been undertaken. These candidates come from across the world

Several Training organisations have enquired about how they can be assessed to manage a compliant training programme. These will be the “Endorsed Trainers”

Qualifications will **only** be achieved through a network of 'Endorsed Trainers' endorsed by the Iiom

Companies designing and manufacturing their own systems may wish to publicly recognise their Obsolescence Management Capability

End Users are increasingly asking for evidence of the ability to manage Obsolescence in new contracts

Companies offering solutions to obsolescence may also wish to demonstrate their awareness and knowledge in this area

For these reasons IIOM is developing a capability assessment using international standards and the UK developed TOMCAT (Total Obsolescence Management Capability Assessment Tool) This tool offers a unique capability to demonstrate the current level of capability and guide companies on improvements needed to reach the next level

- **Only** IIOM Endorsed Assessors could audit projects and organisations for compliance against IEC62402:2007 and other International standards
- This also applies to the TOMCAT tool

One of IIOM's Mission statements is to:
Promote and recognise high standards of practice and
professional competence

We are the leading international community of
Obsolescence Practitioners
