IIOM AGM and Members Meeting Agenda for 15th October 2019

Held at Double Tree by Hilton Swindon, Lydiard Fields, Swindon, Wiltshire, SN5 8UZ

This meeting is sponsored by **Force Technologies Ltd**

15th October 2019

- 09.15 IIOM UK AGM
Acceptance of Directors Report
Adoption of Annual Accounts
- 09.30 IIOM UK Members Meeting
Introduction, Housekeeping, and IIOM UK Update – Jon Anslow, IIOM UK Chairman
- 09.40 IIOM International Update – Wolfgang Heinbach, COG Germany Chairman and President IIOM International
- 10.00 Sponsors Welcome – Karen Salmon, Force Technologies
- 10.20 IEC62402 – What do Companies need to do to Implement the Standard? – Nathan Eldridge, EDF Energy
- 10.35 Break
- 11.05 REACH Update – Terry Rees-Pedlar, BAE Systems
- 11.25 Discussion Group "PCN: Drivers and Resisters for Improving the Process"? – Led by Ian Blackman
- 12.30 Lunch
- 13.30 Designing to Avoid Obsolescence – What can Engineers do? – Phil Wardle, Blackwater Innovation Ltd
- 14.00 The Electronic Components Market – An Update... Yet More FUN...! – Adam Fletcher, Chairman ecsn and IDEA
- 14.30 Working with Distributors that Offer Design in Services – Eddie Petch, APC
- 15.00 An introduction to SCAF – Sanathanan Rajagopal, Chairman SCAF
- 15.30 Closing Remarks – Jon Anslow, IIOM UK Chairman
- 15.35 Close

The following information is intended to provide attendees with more information on the presentations

IEC62402– What do Companies need to do to implement the standard? - Nathan Eldridge, EDF Energy

The past guidance is now a standard, this short presentation will look at how implementing the standard should change industry processes and actions.

REACH Update - Terry Rees-Pedlar, BAE Systems

Terry will give us the latest news on REACH and other legislative matters.

Discussion Group "PCN: drivers and resistors for improving the process"? Led by Ian Blackman

For some time, designers and purchasers have been seeking better notification of product change and obsolescence from non-electronic suppliers. IOM wish to explore the scope for funding research in this area and to identify whether the SmartPCN process will make a difference.

Designing to avoid Obsolescence – What can Engineers do? – Phil Wardle, Blackwater Innovation Ltd

There are many best practice ideas that engineers can employ to improve the sustainability of products with better planning from the concept stage onwards. Phil will share some real-life examples.

Working with Distributors that offer design in Services- Eddie Petch APC

The world of component distribution continues to change dynamically and the resurgence of design in specialists' companies rather than broadline distributors or online catalogue sellers is an interesting one. Eddie will show what benefits arise from including such companies in your supply chain.

The Electronic Components Market – An Update... Yet More FUN...! -Adam Fletcher – Chairman ecn and IDEA

“Putting tin hats and flak jackets on” may be the order of the day but the electronic industries advance will continue to be successful...”

The current slow-down in the global electronic component supply network will be short lived as strong growth returns driven primarily by the 5G Infrastructure and handset market but it may get derailed slightly by trade wars on multiple fronts...

An introduction to SCAF - Sanathanan Rajagopal Chairman SCAF

It is important that IOM members recognise specialist skills in similar national organisations whose work could benefit them. Sanathanan will describe the Society for Cost Analysis and Forecasting and what it does.
